

Erik Nguita

Desired Position: Senior Backend Engineer

Former Marine Master with a desperate love to code.
Have commercial, freelance experience & more than 8 years working with different languages and projects.

My current stack of technologies is:

Java Script / Type Script / Node JS / KOA / NEST / Graph QL / NEO4J / POSTGRES / RABBIT MQ

Well experienced in deployment server administration and devops operations (GCP/AWS).

IMPORTANT NOTICE:

I'm currently located in Thailand. But this **WILL NOT** affect the working time frame on YOUR project.

I'm already 2 years here, and all that time working within the Ukraine time zone without any issues. There are no changes for my team members.

I'm already used to doing my personal things in the morning and then work from 14:00 to 22:00 (10:00-18:00 Kiev time).
Hope we can match well)

COMMERCIAL PROJECTS:

Company: PUMB (First Ukrainian International Bank) – 2022 - now

<https://www.digital.pumb.ua>

Technology: Typescript, Nodejs, Postgres, Redis, Kubernetes, Microservices, RPC, Nest, RabbitMQ, Helm Charts, Functional Typescript, Vault, Keycloak, Jaeger, Prometheus.

Participation:

- Setup logging/tracing and monitoring systems. Integration with Grafana/Prometheus
- Setup and management of encrypted access to resources
- Handling heavy load requests and parallel microservices balancing
- Writing custom NPM packages for internal use across multiple microservices
- Setup deployment process, managing and scaling resources, Kubernetes containers orchestration
- Fixing and adding features to existing microservice creating new microservices.

OTHER PROJECT (NDA)

Description: Large Gaming / Gambling / Betting platform

Technology: Typescript, Nodejs, NestJS, Postgres, Redis, Kubernetes, Microservices, RabbitMQ, Amazon

Company: Digis – 2020 - 2022

<https://gemlightbox.com/> - web and mobile platform for Jewelers

Technology: Typescript, Nodejs, Koa/Express, Postgres, Kubernetes

Participation:

- Setup logging/tracing and monitoring systems. Integration with Kibana/Jaeger
- Setup CI/CD automated deployment on GCP Kubernetes
- Organize code review system, static code linting, automated tests and versioning.
- Server-side-rendering for frontend REACT client
- Integrations with side API's: Shopify (GRAPHQL/REST API), Hubspot (REST API), Rapnet (SOAP API)
- Microservice architecture development.

Company: Boost (2017-2019)

Technology: React, Node, Express, HTML5, CSS3, TypeScript

Participation: Fixed issues, created new features, Optimized some code, Wrote test on front and back side

Company: Xovi.DE (2016-2017)

Technology: PHP, ZENDFRAMEWORK, MYSQL, JQUERY, HTML5, CSS3

Participation: Functionality for parsing and other instruments for SEO optimization

PERSONAL PROJECTS: 2014 - Now

NATIONALITY: Ukraine

LOCATION: Phuket / Thailand

CONTACTS:

MOBILE (THAI) : +66 (082) 454-11-37

MOBILE (UA) : +38 (098) 765-55-55

EMAIL : nguita.erik@gmail.com

GITHUB: github.com/erik7z

LINKEDIN:

linkedin.com/in/eriknguita

LANGUAGES:

English: Advanced/Fluent

Ukrainian: Native

Russian: Native

TECHNICAL SKILLS:

Computer Languages:

Javascript, Typescript, Functional Programming (fp-ts), PHP, SQL, Cypher Query Language

Web Development:

Express, KOA, Nest, GraphQL, React

Testing frameworks:

Mocha JS, Jest

Server Software:

NodeJS, Nginx, Apache, Docker, Kubernetes.

Databases/ORM:

MySQL, Postgres, Neo4j, MongoDB, Redis, ElasticSearch

Frameworks:

Express, KOA, Nest,
JS – React JS, Apollo GraphQL
PHP – Zend Framework 2/3

Other:

Rabbit MQ, Socket.io, Vault,

<https://www.npmjs.com/package/jaeger-logger> – Logging/Tracing library

- Nodejs library for managing application logging/tracing

<http://askseaman.com> – FULL STACK Q&A PLATFORM

- Full stack project built with GRAPHQL, REACT, APOLLO, NEO4J, TYPESCRIPT containerized using docker containers and served with NGINX
- Database schema & Type definitions based on project prototype
- Query/Mutation resolvers for auth & other CRUD operations
- Reusable React components & full sections
- Server & client side authentication
- Launching and setting up ubuntu server on amazon AWS
- Setting project parts as a multiple services using Docker containers
- For more see repo: <https://github.com/erik7z/askseaman.com>

<https://seacontact.com> – SOCIAL NETWORK FOR SEAMANS

- This project was completely done by myself, using Zend Framework 2 as MVC platform for backend. Frontend was developed using Bootstrap, JQuery and various utilities/github plugins.
- Site is hosted on a cloud based Ubuntu machine using Nginx server
- Application is based on multiple services running in Docker containers
- Database requests cached by Redis
- SSL is manually configured for all sub-domains

<https://api.seacontact.com> – REST JSON API

- API for mobiles was developed using all necessary standards and requirements for API RPC interfaces. Currently I'm working on a mobile application which is using this API.
- API landing page and extensive documentation

<https://admin.seacontact.com> – MAIL SERVER, PDF GENERATION, PARSING CRAWLERS

- Seamans database parsed from other sources using custom CURL based crawlers
- Mailing system for admin panel using custom mail server based on SendMail & PostFix.
- Generating a pdf file of user cv's using various pdf generating techniques.
- Organizing permission system for social network users using RBAC and ACL

<http://djgrafkashinsky.com> – Famous DJ personal page

- The aim was to make a simple beauty webpage of one famous dj. Backend developed on a custom PHP framework using MVC principles. Frontend made on plain HTML, CSS, Javascript, extensive use of JQuery. Efforts were made to make the website responsive for different screens and layouts

<http://oceancontract.com.ua> – Crewing agency landing page

- Plain HTML/CSS landing page made for ocean-contract crewing agency

<http://1reis.ru> – Educational materials for beginner seamans

- Website built on custom PHP framework using MVC principles. Frontend made on plain HTML, CSS, Javascript.

FEW MORE WORDS ABOUT ME:

I'm free of any bad habits, love sports and martial arts.
But what I really love is to learn new stuff and get more experienced in coding.
That's the only reason I've changed my sea career and dived into the IT world.
My life is continuous learning, and I want to become a master of IT technologies the same as I became a Master marine.

COURSES (ONLINE):

Keycloak, Jaeger Tracer

Operating Systems:

Linux Ubuntu, OS X, Windows

Development Software:

VSCode, PhpStorm, Sublime Text,
Postman, MySql Workbench, Robo
3T, Altair GraphQL, Android Studio,
Git, Bitbucket

BOOKS & SOURCES OF KNOWLEDGE:

Роман Савин – Тестирование
DOT COM

Борис Вольфсон – Гибкое
управление проектами и
продуктами

Eric Ries – Lean Startup

Дмитрий Осипов – Технологии
проектирования баз данных

Baron Schwartz, Peter Zaitsev –
High Performance MYSQL

Ian Robinson, Jim Webber – Graph
Databases (NEO4j)

Gregory Jordan – Practical NEO4j

Eve Parcelllo, Alex Banks – Learning
GraphQL

Nathan Rajlich – Node.js in Action

Mark Tielens Thomas – React in
Action

Adam Boduch – React and React
Native

Addy Osmani – Javascript Design
Patterns

O'Reilly – Head First Design
Patterns

John Resig, Bear Bibeault –
Javascript Ninja

Marijn Haverbeke – Eloquent
JavaScript

O'Reilly – Head First Javascript

I've listed below only courses done in the last year. I'm continuously involved in self-education and ready to learn any other technology or language required.

- Pluralsight - [Docker](#) for Web Developers with John Papa and Dan Wahlin
- Udemy - The Ultimate [MySQL](#) Bootcamp Go from SQL Beginner to Expert
- Lynda - Up and Running with [Neo4j](#)
- NewLine - TinyHouse A Fullstack React Masterclass with [TypeScript](#) and [GraphQL](#)
- Udemy - Understanding [TypeScript](#) - 2020 Edition (Maximilian Schwarzmuller)
- Udemy - MERN Stack Front To Back: Full Stack [React](#), [Redux](#) & [Node.js](#)
- Udemy - [React Native](#). Полное руководство для Мобильной Разработки (2019)
- Lynda - Building Complex Express Sites with [Redis](#) and [Socket.IO](#)
- Udemy - Master [NodeJS](#) : The Complete Front-End Developer Course
- Udemy - [ElasticSearch](#), [LogStash](#), [Kibana](#) ELK #1 Learn Elasticsearch

OTHER COURSES:

- Unit School Of Business - Startup Founders course (2020) (OFFLINE)
- Y Combinator Startup School - Future Founders course (2020) (ONLINE)

EDUCATION (NON - IT RELATED):

- KYIV STATE MARINE ACADEMY - Specialist - 2015
- ODESSA NATIONAL MARITIME ACADEMY - Bachelor - 2012

MARINE CAREER (IF YOU REALLY INTERESTED :)

2016-2017 - Master Marine	Bernhard Schulte Shipmanagement - (VEGA SUN, VEGA STAR)
2012-2016 - Chief Officer	DORIAN LPG LTD - (LPG GRENDON, LPG CONCORDE)
2008-2011 - 2nd Officer	PTE OCEAN TANKERS - (M/T Po Yang Hu, M/T Dong Ting Hu)
2007-2008 - 3rd Officer	EXMAR LTD - (M/V Borzna, M/V CMB Biwa)
2006-2007 - Deck Cadet	BOCIMAR LTD - (M/V Conceiver)
